

# SECRECY PROTECTION

UBCOM's business is to **generate trust and independence** with the sole aim of defending the economic interests of its clients.

UBCOM's experts offer technological and human support in the implementation of secrecy management protocols.

**THANKS TO UBCOM'S SUPPORT, YOU WILL  
BENEFIT FROM :**

The use of agile, independent and integrity tools

Sovereign, innovative and technology-intensive strategy consulting

About: UBCOM is a Swiss strategic cybersecurity and secrecy protection agency, founded in 2014. UBCOM acts in cyber risk prevention and protects the tactical and strategic information asset of companies. The agency offers concrete solutions in cyber defence, secrecy protection and digital sovereignty. Its mission is to protect the economic interests of international players in the global marketplace against economic intelligence and corporate spying.

# PROTECT YOUR TACTICAL AND STRATEGIC INFORMATION

Human error is the cause of **99% of compromises**.

In economic warfare, cyber security is nothing without social engineering. The physical protection of information systems depends on a culture of secrecy.

## Digital Security

Is about the **availability and resilience of an information system** : creating redundancy and handling the user accesses (*passwords, active directory, accounts...*).

## Cybersecurity

Is all about a **holistic approach of digital security, secret protection and risk analysis**. This three-pronged reflexion leads to being able to detect vulnerabilities before they are used.

## HOW UBCOM PROVIDES SUPPORT TO ITS CLIENTS

### 1. Business secrecy protection

UBCOM experts have developed sovereign cybersecurity strategies based on solid experience in economic counter-intelligence, complemented by specific training in handling classified data. Our protocols offer high levels of resilience, allowing our clients to benefit from intuitive, easy-to-deploy and affordable technology.

### 2. Neutrality through the Swiss constitution

As the right of pre-emption of information does not apply to Switzerland, your tactical and strategic secrets will never be revealed. Because "the right to know" is not reserved for the « Bureau des Légendes » (DGSE), train your teams in the duty of reserve.

« *The value of information is often misjudged and the personal nature of data underestimated. A simple leak of salary slips can trigger strikes and bring a business to a standstill. A leaked patient file can damage the reputation of a health professional.*

*UBCOM's support has taught us to weigh and consider all data, before processing, storing and sharing it. »*

**CEO of an SME in the health sector**

## WHY CHOOSE UBCOM TO PROTECT YOUR BUSINESS SECRETS ?

UBCOM wishes for a european digital sovereignty policy. We guide each of our clients in defining its own sensitive informations and tailor bespoke protections. Our experience and methodology are unique and exclusive to our clients.
